Genius
Fast and efficient colour matching.

STANDOX

The Art of Refinishing.

Genius helps you
get a good grip on colour.

Genius takes electronic colour shade measuring to the next level. Colour can now be measured quickly and efficienly, directly from the car body.

genius

Calibrate

If you want to measure colour quickly, reliably and efficiently, Genius is a must.

Simply place the convenient measuring device on the car to gather the relevant information quickly and simply.

With Genius, the colour will be measured directly from the cleaned car body, close to the damaged area. Genius reliably identifies solid and effect colours. The results returned by this three-angle colorimeter are very precise. Genius stores the measured data so that it can be directly translated into ready-to-use mixing formulations on a PC with Standowin. This way, the right colour can be picked out from over 500.000 stored formulations in different qualities.
